Heal and, then, help others to heal. You are invited to embark upon a journey of enhanced awareness, internal empowerment, self-acceptance and love... and, then, to guide others through that same path.

Learn and, then, Teach How To:

- Rewire debilitating emotional patterns.
- Stop unwanted behavior patterns.
- Cultivate internal security and loyalty.
- Choose supportive relationships.
- Practice healthy boundaries.
- Unlock your intuition.
- Source your creativity.

We have combined our survivors' counseling program with our coaching certification program... so that you can graduate from the counseling process with your own private coaching practice, helping other survivors.

We are looking for people who have what we cannot teach: a natural gift and calling for working with others.
